Issue 1: Fall 2013

Voyagers taking in the size of Lambeau Field.

Smiles from the ferris wheel.

Voyages for Growth was developed to provide opportunities for individuals with developmental and physical disabilities to grow and expand their level of interest and community engagement through unique travel experiences.

Often, individuals with disabilities are not able to obtain many typical life experiences. There are many financial and physical barriers preventing individuals with physical and mental disabilities from successful and enjoyable life experiences. Donations to the North Central Health Foundation have helped

remove those barriers, and provided opportunities that participants would never have thought possible.

In August, our first group of Voyagers set out on an adventure to Green Bay. Participants engaged in two full days of activities including a Packer Hall of Fame tour, a lunch at the stadium, Green Bay Packer training camp, and even high fives with players from the team after practice. To top off the experience, Voyagers spent time at Bay Beach Amusement Park. Some Voyagers experienced their first ride on a ferris wheel! Trips will continue into the fall to Door County, Milwaukee, Chicago, Dollywood and Florida.

**Experiences like these provide motivation to think outside the box, and the belief that anyone can do anything with the right support.**

At the Packer Pro Shop.

Thumbs up!

Excitement outside Lambeau Field!
